

OII-YS™

THE Natural Adjuvant

Application Rates of ONLY 1-2 Pints Per Acre!

-  All new adjuvant with natural ingredients for agriculture and horticulture crop production.
-  For use with nematicides, fungicides, fertilizers, herbicides, insecticides, and nutritional sprays.
-  Our principle functioning agents combined synergistically to deliver multi-purpose adjuvant benefits.
-  May be applied to turf, fruits, vegetables, ornamentals and row crops.
-  May be used to increase absorption and infiltration in hydrophobic soil/media.
-  Environmentally friendly.

About OII-YS™

Yucca has long been used by the food industry as a human nutrient supplement and to prepare natural shampoos, cosmetics and liquid soaps. The same properties that make it safe and effective for these products also make yucca a superior agricultural surfactant.

This new adjuvant combination is the only one of its kind and is an important addition to any grower's arsenal. The one-two punch of OII-YS™ is delivered through the superior wetting and chelating properties of its active ingredients.
